

CLOUD SECURITY FORENSIC INCIDENT REPORT

Case ID	FR-2026-002258	Severity	CRITICAL
Date / Time	2026-04-25 00:22:58	Attacks Detected	2
Attack Types	BRUTE_FORCE, RANSOMWARE	Status	INVESTIGATION COMPLETE

1. EXECUTIVE SUMMARY

This forensic report documents a cloud security incident detected on 2026-04-25 00:22:58. The investigation identified **2 attack type(s): BRUTE_FORCE, RANSOMWARE**.

A total of **3** file activity events were recorded, **16** authentication and access security events, and **5** system alerts were generated. **0** IP address(es) or user account(s) were blocked by the automated response system.

2. ATTACK 1: BRUTE FORCE PASSWORD ATTACK

Attacker IP(s)	192.168.1.105
Target Username(s)	admin
Total Failed Attempts	16
First Attempt Time	2026-04-25 00:21:41
Last Attempt Time	2026-04-25 00:22:38
Status	■ ATTACK DETECTED & BLOCKED

Failed Login Attempts Per IP:

IP Address	Failed Attempts	Risk Level
192.168.1.105	16	CRITICAL

3. ATTACK 2: RANSOMWARE FILE ENCRYPTION ATTACK

Suspicious Files Detected	1
Files Encrypted/Locked	2
Files Deleted by Ransomware	1
Files Restored by System	0
Emergency Stops Triggered	0
First Ransomware Event	2026-04-25 00:22:57
Last Ransomware Event	2026-04-25 00:22:57
Status	■ ATTACK DETECTED & FILES RESTORED

Encrypted/Locked Files Detected:

#	File Name	Status
---	-----------	--------

1	annual_report.txt.locked	ENCRYPTED → DELETED BY SECURITY
2	annual_report.txt.locked	ENCRYPTED → DELETED BY SECURITY

4. ATTACK 3: UNAUTHORIZED ACCESS ATTEMPT

■ No unauthorized access detected during this incident.

5. BLOCKED IPs AND USERS

No entities were blocked during this incident.

7. AUTOMATED RESPONSE ACTIONS TAKEN

- Brute force attack detected and blocked
- Attacker IP(s) ['192.168.1.105'] blocked
- Target username(s) ['admin'] protected
- Ransomware activity detected via file extension monitoring
- 2 encrypted files removed from cloud
- 0 original files restored from backup
- Emergency stop triggered to halt further encryption
- All evidence saved to forensic-evidence bucket in MinIO
- Complete forensic PDF report generated

9. SECURITY RECOMMENDATIONS

Immediate Actions:

- Change all MinIO access keys and secret keys immediately
- Reset all user account passwords
- Review and revoke any suspicious access tokens
- Restore any affected files from clean backup

Authentication Security:

- Enable Multi-Factor Authentication (MFA) for all accounts
- Implement account lockout after 3 failed login attempts

- Use strong password policy (min 12 chars, special chars)
- Restrict login access to known IP addresses only

Access Control:

- Apply strict bucket policies (least privilege principle)
- Restrict forensic-evidence and quarantine buckets to admin only
- Regularly rotate MinIO access keys every 30 days
- Audit all user permissions quarterly

Monitoring & Prevention:

- Keep this detection tool running continuously
- Set up email alerts for all CRITICAL security events
- Enable MinIO audit logging to S3
- Conduct monthly penetration testing on cloud storage
